Passing Year 2004

18 Projects in PHP

PHP frameworks covered projects

Laravel 3 projects
Codeigniter 6 projects
Symfony 2 Projects

Details of the projects

Payment Network Marketplace

This project was built for the Marketplace for supply chain financing. which enables the expertise and technology-based solution to access easier & faster financing for Anchor and Landers.

Responsibilities

- Understanding processes from the process team and their requirements and challenges provide them with an easier solution.

- Taking weekly requirements and delivering modules based on the timelines, mostly weekly deliveries.
- I was responsible for creating new and modifying existing modules using frontend and backend technologies.
- I need to take care about how the end user will experience the system workflow and how the UI will display it to the end user.
- In the backend I have consumed and processed the web services created by other teams.

Tach Stack PHP 8,Codeigniter, Postgresql, Web Services.
.

Momsbelief

Mom's Belief focuses on awareness & intervention required for every child's all-round development. We encourage EQ & skill-based learning. We also empower parents, professionals, teachers & caregivers of children with developmental delays/disabilities via our multidisciplinary expertise, best-standardized clinical approach & most versatile intervention programs for both online & offline platforms.

Responsibilities

I was responsible for creating complete modules using frontend and backend technologies aka full stack development. I need to take care about how the end user will experience the system workflow and how the UI will display it to the end user. In the backend I have consumed and processed the web services created by other teams.

Tech Stack

Laravel 8, MYSQL database, Rest Web Services.

Intercell World

Intercell connects you with domain experts from your field. Talk to industry experts today from the field of your interest. No matter in which field you wish to pursue your dreams, Intercell has a qualified mentor who can tell you where you are today, where you can be tomorrow and what you could do to get there fast.

Tech Stack Angular, Codeigniter, Mysql, AWS, Microservices, REST.

Rekrutify.com

Job portal like naukri.com and indeed.com

The aim of this project is to design and develop a Job portal, on which End users can search jobs & apply online for a specific job. Companies can also post their jobs to find employees for their company. This portal will benefit companies and job seekers. This portal will be specified only for jobs. Online business on this portal is beyond the scope of this project. Job seekers can search and apply online for jobs related to their fields within a specific area and

salary. Similarly, companies can post their jobs on this portal with specific information for applicants. This portal will maintain the database of jobs (posted by companies) as well as jobs applications (posted by job seekers)

Three major sections :-
        Candidate portal
        Employer Portal
        Admin Portal
        Affiliate Portal
Tech Stack. Laravel 5, Digital Ocean, MySQL, AI Resume Parsing, REST

www.SIO.World

One of a kind online booking platform that provides users to seamlessly browse for their next sports outing, spa treatment or fitness class. Book a walk-in session or purchase monthly memberships at one of partnered locations.

1. Responsible for creating All required REST web services for mobile platforms and websites.
2. Partner Vendor panel to manage booking, User, slots, games, payments.
3. Master Admin panel to manage mobile application and Vendors Users.

Ebay Automation

1. This function will mirror the site TRACKERBOT.ME
2. A user will supply us with the gmail account that they receive their order shipment confirmation from Amazon.
3. A user will supply us with the gmail account associated with the ebay account.
4. Ebay orders will be matched to Amazon purchases using a buyers name and the first part of the address associated with the ebay order and shipment confirmation email from the supplier or other usable matched information.
5. Recognized shippers will be populated by temp tracking numbers from the Algorithm.
6. The matched tracking will be uploaded to ebay as soon as it is received.
7. Options for automated emails can be sent to buyers when their orders are shown to have been shipped, and also as delivered. Including links to Correct Tracking.

Tech Stack. Microservices, REST, MYSQL.

Www.aumzenyoga.com

This website is about Exclusive Techniques Meditations Celebrations Tantra Yoga Astro Apparels.
This is a kind of e-commerce and social network where users can purchase events and services.

Www.yogurtmaker.ca | www.lodgecastiron.ca | www.rokespresso.ca

These Three projects were in the OPENCART platform. I have customized the whole website with 48 extensions most of them were customized with client instructions.

Crowd funding Website

Crowdfunding is a way of raising finance by asking a large number of people each for a small amount of money. Until recently, financing a business, project or venture involved asking a few people for large sums of money.

1. Creating Admin panel for master admin
2. Creating a Co admin panel which is created by admin with custom permissions.
3. User Dashboard where users can create and check their cause donations.
4. Front end website.

eg. ketto.org, milaap.com

Loudmedics.com

Admin dashboard development in codeigniter framework where users can manage all frontend websites and user dashboard.

Www.tiipoi.in

Wordpress e-commerce website.

www.relp.in

This website is built with a codeigniter. This is about finding room and space for business for lease and sale.

About me

Hard working, positive attitude, self learner to latest technologies, capable of making vision to reality, good personality, honest.
