Passionate about web development with 2 years of experience, I specialize in creating robust, scalable, and user-centric web solutions. My expertise spans both back-end and front-end development, allowing me to deliver seamless, high-impact websites and applications. As a team lead, I've successfully spearheaded e-commerce projects that drive business growth and enhance user experiences. I'm eager to leverage my skills in a senior role to deliver innovative digital solutions for clients.

Experience

Senior Web Developer - **Techflux Solutions**   *March 2023 - Oct 2024*

- Enhanced user experiences by developing dynamic CMS and e-commerce modules.
- Designed and implemented seamless content management systems for dynamic websites, improving site efficiency.
- Created a robust mobile repair module featuring dynamic brand and sub-brand management.
- Led teams effectively to ensure project success and on-time delivery, consistently achieving client satisfaction.

Web Developer Trainee - **Manasvi Tech Solution Pvt Ltd**   *Aug 2022 - Dec 2022*

- Contributed to the Hindustan Petroleum Corporation Limited project, driving the successful implementation of critical features.
- Developed a comprehensive Inventory Management System, streamlining operations and improving efficiency.
- Designed and delivered websites for Manasvi Tech Solution Pvt Ltd and Shivam Eye Care, enhancing their online presence and user engagement.

Web Developer Intern - NP IT Solution   *Sept 2021 - Feb 2022*

- Developed and maintained dynamic web applications using HTML5, CSS3, JavaScript, and MySQL, contributing to enhanced functionality and user experience.
- Analyzed project requirements to design and implement optimized features, improving application performance and addressing client needs efficiently.

Projects

Play@Work

- Developed a project management tool to enhance team collaboration and productivity, including project creation with automatic member inclusion.
- Implemented task assignment with a dynamic point system, where points are distributed based on task complexity and completion.
- Integrated a time-tracking system that allows users to start, pause, and stop the timer for each task, ensuring accurate calculation of time spent.
- Provided super admins with the authority to adjust point allocations throughout the project, allowing flexibility in task prioritization and performance metrics.
- Designed role-based access controls, enabling users to have view-only or full access to actions based on their designated roles, ensuring secure and focused workflows.

CMS Project (Connected to a Website)

- Developed a category management system allowing users to fill forms with titles, aliases, long descriptions, and short descriptions.
- Integrated article creation with category selection via dropdown menus, where users could assign categories and fill in relevant data.
- Created a mobile repairing module with three tabs: brand, sub-brand, and repair category. Users can select a brand (e.g., Apple), enter a sub-brand (e.g., iPhone), and add multiple repair types for devices with corresponding prices.
- Implemented an e-commerce system with product categories and individual product management. For instance, users could categorize products like "bottle" and assign detailed information under each product.
- Built additional features like customer management, order summaries, commissions, and customizable mail templates to streamline e-commerce operations.
- Provided super admins with the authority to adjust point allocations throughout the project, allowing flexibility in task prioritization and performance metrics.
- Designed role-based access controls, enabling users to have view-only or full access to actions based on their designated roles, ensuring secure and focused workflows.

HR Management System (HRMS)

- Developed modules for recruitment, onboarding, training, performance evaluation, and leave management.
- Automated processes for disciplinary procedures, payroll, and policy development.
- Streamlined employee exit procedures with enhanced tracking and compliance features.
- Revolutionized HR operations by improving efficiency, compliance, and overall organizational effectiveness.
