Professional Summary

I am a full-stack developer with 4+ years of experience working with React.js, Laravel, and other modern technologies. I excel at building projects from scratch to completion, with strong debugging skills. I am comfortable working independently or in a team and am highly dedicated to delivering projects on time. My experience spans domains like banking, e-commerce, and enterprise systems.

Professional Experience

Software Engineer | *Neosoft Pvt. Ltd.* Aug 2023 – Jan 2025

– Worked on enterprise-level projects in banking and marketplace domains, utilizing Laravel, React.js, and MySQL.
– Developed secure APIs, dynamic dashboards, and scalable front-end systems with a focus on user experience.
– Contributed to operational tools for target setting, RNR, and appraisal systems.

Associate Software Engineer | *TossCall Services India Pvt. Ltd.* Aug 2020 – Jun 2023

– Designed and implemented web applications tailored to client needs in education and banking.
– Built and integrated secure APIs using PHP frameworks, including Laravel and CodeIgniter.
– Streamlined operations and enhanced usability for student registration and tracking systems.

Education

Bachelor of Engineering (BE) in Computer Science | *Shri Shankaracharya Institute of Technology and Management, Bhilai* Aug 15 – Jun 19

– Grade: 67.8
– Actively coordinated programming-related events and led development initiatives.

Skills

Programming: HTML5, CSS3, JavaScript, PHP, MySQL, React.js, Redux Toolkit
Frameworks: Laravel, CodeIgniter, CakePHP, Bootstrap
Tools: Git, GitHub, Postman
Others: REST APIs, JSON, XML, jQuery, Ajax

Projects

1. Indian Overseas Bank (IOB) Live Project

– Worked on-site to develop modules like rewards and recognitions, target setting, and appraisal systems.
– Designed systems for hierarchical target allocation from vertical head to branches.

2. WallArteMall (Canvas Printing) Live Project

– Built a dashboard software for managing print orders, stock, and user access control.
– Developed user landing pages and streamlined order workflows.

3. Human Resource Management System (HRMS) Live Project

– Rebuilt HR operations software for attendance, leaves, salaries, and client billing.
– Implemented features like customized reporting and regulatory compliance (PF, ESIC, etc.).

4. Adesso Health (Cardiac Risk Software) Live Project

– Collaborated with international developers on a health-focused solution for cardiac risk assessment.
– Contributed to backend (Laravel) and frontend (React.js) development in a Microsoft Azure environment.

5. CMS News Application GitHub Repository

– Built a content management system for publishing and viewing news articles.
– Features include author-wise filtering, latest news, and date-based browsing.

Certifications

– Certified PHP Developer.

Awards and Recognitions

– "Employee of the Month" at Neosoft Pvt. Ltd.
– Recognition for implementing process improvements.
